Re: Administrative Unilateral Order, EPA Docket Number 1089-10-21-106

Dear Sirs:

Pursuant to Paragraph 46(F) of the referenced Order, I am directing that the asbestos containing material on the estimated 280 feet of pipe on the south side of the main baghouse at the lead smelter be removed in accordance with the Order.

Representatives of Dames and Moore have been shown the area requiring asbestos abatement and are aware of the abatement method necessary.

If you have any questions, please contact me at (206) 442-1196.

Sincerely,

A handwritten signature in cursive script that reads "Jeff Webb".

Jeff Webb
